

New pump quotes

Manufacturer	Rebuild	New pump	Info
Stenner	\$1200 Each	\$ 1,817.48	Model S420 - Peristaltic style pump. More maintenance required than a diaphragm pump.
Prominent		\$1805 - PACH, \$1900 for SHC	Gamma X - Diaphragm pump. Less maintenance than a peristaltic. Less chances for flow interruptions.
Iwaki		\$660.58	Diaphragm pump. Ideal for small system. Less known than the other manufacturers, but PCWA uses them everywhere and they work great.

* Possible extra cost for controls wire/cable. Prominent cost is \$50-100 per pump so I doubt the Iwaki would be more if needed. No cost to install, will be during normal operating hours. Shouldn't need any programing, if so, it would be minimal.
